

LOCATION PLAN  
 0 300 600 FT

Note: It is the intention to make the capacity of the Reservoir as great as possible between El. 195 & 200. The size of Reservoir will therefore be increased by excavating around the margin above El. 195 as far as possible without jeopardizing the water-tightness of the Reservoir. See Sections On Sheet N° 93.

SECTION S1  
 0 10 FT
